

Deliberate Practice Plan Grading Matrix

The plan will receive a grade for three course objectives: 1, 5 and 6.

Objective 1 - 10 points

1 point - Is the plan accessible via a link in the footer from the site owner's home page?

3 points - Is the plan a valid, semantic HTML5 web page?

3 points - Is the content of the plan contained in valid html containers (paragraphs and lists)?

3 points - Are the various topics within the plan indicated by the use of html headings?

Objective 5 - 40 points, 10 points for each topic

1. Where the deliberate practice will be done.

2. When the practice will be scheduled for.

3. How much time will be allocated for the practice.

4. Who will be used for feedback and to judge progress.

Each topic should contain details to make clear what is planned. Also, a subjective judgement will be made by the grader as to the realistic nature of the plan, in other words, "Is the plan doable?".

Objective 6 - 10 points

Is the grammar correct? Is the plan free from spelling errors? Does the plan communicate clearly the intent of the owner?
